Dr. Thomas Kuperferschmidt
Director, Sales
Leisegang Feinmechanik Optik GmbH
a COOPER SURGICAL company
Leibnizstrasse 32
D-10625 Berlin, GERMANY

Dear Dr. Kuperferschmidt,

I am delighted to learn that Leisegang is completing 70 glorious years in the industry and that I have been requested to pen my experience about the Leisegang colposcopes.

I first saw a Leisegang colposcope when it was displayed in one of the stalls at the Scientific Exhibition of the All India Congress of Obstetrics and Gynecology in 1991 in New Delhi. I was amazed at the clarity of the pictures viewed through the colposcope.

I have been using the Leisegang colposcope since 1995 when I was the Chief of the Colposcopy Unit at Lady Hardinge Medical College, New Delhi. At that time the clinic had the Leisegang colposcope model 3BD with the Leisegang stereo still camera and Sony video camera. The photographs were amazing.

Currently, I am working at the Mazumdar Shaw Cancer Center at Narayana Health Hospitals at NH Health City, Bangalore. Our Chairman Dr. Devi Shetty, a person who believes in the highest standards of medical care, had asked me to recommend the "top end" colposcope when we started the colposcopy clinic in 2009. The clinic has two Leisegang colposcopes. One is a photocolposcope model 3ML with a Canon 450D EOS camera customized to be used with the colposcope. We also use the Leisecap Patient Management Software. The other is a video colposcope model 3MV with S-video interface which also has excellent optics.

The essence of a colposcope lies in the quality of its optics. It is a pleasure and delight to use these colposcopes, as the optics is truly fantastic and incomparable. The digital photographs are truly of high quality and can be captured at magnifications of 7.5X, 15X and 30X. The Leisecap patient management software is very user friendly.

I am sure Leisegang will continue to maintain the very high standards it has set for itself and through the innovations will continue to manufacture very high quality colposcopes. Thereby, Leisegang will help the colposcopists world wide in ensuring women's health through the early diagnosis and treatment of precancers and early cancers of the female genital tract.

My hearty congratulations for Leisegang for reaching this important milestone of 70 years!

With best wishes,

Prof. B. Shakuntala Baliga
Chief of Colposcopy Services
