Dear Thomas

We have no hesitation in recommending your products.

The University of Cape Town / Groote Schuur Hospital Colposcopy unit performs about 80 to 90 colposcopic examinations per week. We have been using Leisegang colposcopic machines for the past 15 or so years. The Video colposcope purchased in 1999 has been an excellent purchase and is an excellent teaching device, both for our undergraduate and post graduate medical students and Gynecology Fellowship trainees. It works well during Colposcopic Workshops that the department runs.

We thank you for such reliable machines and Congratulations on your long service anniversary.

Prof L. Denny and Dr N. Mbatani
