we detect it early
Dear customers,

With over 65 years of experience in the development and production of colposcopes, the name Leisegang stands for traditional German engineering excellence. Throughout our history we have focused exclusively on colposcopy and now export to over 70 countries worldwide.

The use of high-quality optics, the utilization of the most intensive white-light LED lighting and a high degree of hand-finished manufacturing are the hallmarks of our exceptional quality. As a result, we are recognised worldwide as the ‘Gold Standard’ in colposcopy.

As a subsidiary of the American CooperSurgical Group, we are able to offer you both a full range of products related to the dysplasia consultation and technical expertise all in one.

We thank you for your interest.

Your Leisegang Team
What is colposcopy?

Colposcopy first emerged as a science in the 1920s. In 1925, the German doctor Hans Hinselmann examined and classified a number of epithelial abnormalities and colposcopy was founded. The term comes from the Greek ‘kolpos’, meaning ‘vagina’ and ‘scopia’ meaning ‘look at’. In establishing colposcopy, Hinselmann made a decisive contribution to the early detection of cervical cancer.

Today, colposcopy also plays an important role in the early detection of preinvasive and invasive epithelial abnormalities in the genital tract:

- Cervical carcinoma is the second highest cause of death in woman worldwide;
- More than half a million women worldwide suffer from this type of carcinoma per year;
- Half of them die from the effects of this cancer.

If detected early, cervical cancer can be treated. Naturally, the quality of the colposcope is crucial in this respect. Leisegang Colposcopes deliver a 3D picture due to their excellent optics, various levels of magnification, and first-class illumination. As a result, early and correct diagnosis is possible and lives can be saved.
Six good reasons for choosing LEISEGANG

1 Convergent Optics

Unlike the parallel optics often found elsewhere on the market, Leisegang offers convergent optics for fatigue-free work. The advantage of convergent optics is that light beams come together at a working distance of 300 mm, meaning that the eyes do not have to focus at this distance themselves.

2 Ergonomic Design

Decades of experience and a sophisticated design contribute to user-friendly handling and slim design. Ergonomic adjustment drives for height, focus and angle tilting allow exact positioning to millimetric accuracy. Detachable rings for ocular covers enable use of the colposcope with glasses.

3 LED Lighting

All Leisegang colposcopes are equipped with continuously adjustable white-light LED lighting. A higher light intensity allows a clearly superior contrast, leading to a more precise diagnosis. Leisegang is currently the only company which provides an extremely bright LED spotlight with 45,000 Lux at a working distance of 300 mm.
4 Comfortable Stands

Whether mobile or fixed to an examination chair, Leisegang stands are characterized by an ease of use and a low space requirement. A slim, sophisticated design provides reliable stability, allowing maximum possible movement for precise positioning.

5 Upgrading

Leisegang offers a wide range of accessories, such as micromanipulators, cameras, and photo/video adaptors. By using these adaptors, standard colposcopes can also be retrofitted as photo/video colposcopes, so even with a standard colposcope it is possible to document diagnoses.

6 Durability

A Leisegang colposcope is a great investment from a durability point of view, with even lamp replacement being unnecessary. It’s an investment that will pay off.

Even today, these devices are still used in medical practices:

- Model II, (from the 1960s)
- Model IA, (from the 1970s)
- Model III b, (from the 1980s)
Six good reasons for choosing LEISEGANG

Dr. Shakuntala Baliga
India

„Leisegang is one of the oldest and among the best manufacturers of medical precision instruments in the world. The Leisegang colposcope has been called the ‘Gold Standard’ by the industry and doctors. LeiseCap software is very suitable for gynecologists.”

Dr. Jens Quaas
Chairman of the German Association of Cervical Pathology and Colposcopy:

“I have been working for many years with Leisegang colposcopes. They have very good optics, LED lighting and image quality, and are very user friendly. Their customer service team are available at any time, and offer outstanding expertise.”
Colposcopes

All Leisegang colposcopes have the following features:

- Convergent optical beam path for fatigue-free work
- Vivid, 3D image
- 300 mm working distance
- LED lighting:
  - With a colour temperature of 5,500 Kelvin for excellent contrast
  - With a lighting strength of 45,000 Lux (at a working distance of 300 mm)
  - Only 17 W power consumption
  - An operating life of 40,000 hours (lamp replacement not necessary)
- Continuously variable adjustment
- Green filter for observation of blood vessels
- Compensation for myopia and hyperopia through adjustable oculars
- Standard colour Grey white (RAL 9002). Also available in all colours within the RAL colour system

\(^1\) Excluding angle device
Standard Colposcopes

The standard model for day to day consultations with various magnification settings, green filter, continuously adjustable LED lighting, compensation for ametropia from +7 to –7 diopters and 300 mm working distance.

1E LED

Entry level model for everyday consultations:
- x 15 fixed magnification
- Adjustment drives for focus and height

1E LED Light

Economical entry level model. The working height is determined by the choice of stand:
- x 15 fixed magnification
- Simple tilt function, without fine-tuning

Findings provided by Leisegang exclusive distributor SWSY, China National Scientific Instruments & Materials Corporation
All Leisegang colposcopes have adjustment drives for height (1), focus (2) and angle tilt (3):

**1D LED**
- Standard model with three magnification levels:
  - Magnification adjustor for x 7.5/15/30 magnification
  - Adjustment drives for focus and height

**1DS LED**
- As for 1D LED, but with x 3.75/7.5/15 magnification

**1DW LED**
- As for 1D LED, but with comfortable 45° angled oculars.
  
  **NOTE:** No green filter!

*Except model 1E LED Light*
Photo/Video Colposcopes

Colposcopes for users with more advanced requirements such as documentation or presentation of the examination image on a monitor. Highly dimmed lenses allow for a large depth of focus.

3ML LED

Photo/video colposcope for the documentation of examination results. Intended for the connection of external cameras:
- Magnification adjustor for x 7.5/15/30 magnification
- Integrated mono photo/video optics with the appropriate magnification
- Digital SLR camera or video camera can be connected

3MLW LED

As for 3ML LED, but with comfortable 45° angled oculars
NOTE: No green filter!

3M LS LED

As for 3ML LED, but with x 3.75/7.5/15 magnification

Convenient mounting of cameras via the camera port:
For the documentation of examination results in everyday consultations. With integrated camera:

- Magnification adjustor for x 7.5/15/30 magnification
- Integrated 1.3 Megapixel video camera
- USB 2.0 interface
- For connection to a PC or laptop
- ColpoSoft CD with drivers and basic image viewing software included with delivery!

3MVC LED USB

3MVCW LED USB

As for 3MVC LED USB, but with comfortable 45° angled oculars

NOTE: No green filter!

Slim bottom shell due to integration of the video camera:
Photo/Video Colposcopes

3MVS LED Y/C NTSC

For presentation on a monitor. With integrated camera:
- Magnification adjustor for x 3.75/7.5/15 magnification
- Integrated video camera to the NTSC standard
- Y/C interface (S-video)
- For connection to an NTSC monitor

All models are also available in all colours within the RAL colour system
Stands

Leisegang offers various types of stands, which are either mobile or fixed to the gynecological examination chair.

All stands are characterized by an ease of use and a low space requirement.
Balance-o-matic Stand

Comfortable work thanks to “weightless”, free movement:

- Free horizontal movement within a radius of up to 600 mm
- Space-saving due to foldable frame (radius when folded: 300 mm)
- “Weightless” vertical movement due to balanced, effortless movement system
- Lockable
- Fixed mounting to examination chairs on the right or left is possible
- Five-wheel spider base allows for stand mobility
- A later conversion from chair to wheel mounting is possible
Swing-o-matic Stand

Solid design with low space requirement:

- Free horizontal movement within a radius of up to 600 mm
- Space-saving due to foldable frame (radius when folded: 300 mm)
- Vertical movement through manual adjustment and height drive
- Fixed mounting to examination chairs on the right or left is possible
- Five-wheel spider base allows for stand mobility
- A later conversion from chair to wheel mounting is possible
Upright Stand

Basic model:
- Rigid column with lightweight 5-wheel spider base
- Working height: 907–1270 mm

All models are also available in all colours within the RAL colour system
Accessories

Leisegang offers optimized accessories both for the documentation of findings and for surgical procedures.

**Video Camera**

Compact, high resolution video camera:
- 1.3 Megapixel resolution
- CCD image sensor
- C-Mount lens connection
- USB 2.0 interface
- For connection to a PC, laptop or photo/video adaptor
- Images are available immediately
- Easy connection by video tube or photo/video adaptor
- ColpoSoft CD with drivers and basic image viewing software with delivery!

**Canon EOS**

Canon digital SLR camera with extremely high resolution. In addition to everyday consultations, this camera is suitable for scientific publications and presentations:
- Model 550D and higher
- 18 Megapixel resolution
- CMOS image sensor
- Full HD Movies
- For connection to PC, laptop or monitor
- Easy connection with photo tube and T2 adaptor
- Including T2 adaptor
- Canon lens and HDMI cable not included; photo tube must be ordered separately
Photo/Video Adaptor

Adaptor for the retrofitting of standard coloscopes:
- x 15 fixed magnification
- Mounting kit included

Micromanipulator

For the use of CO₂ lasers:
- For all current CO₂ lasers
- With varifocal lens to focus the laser beam
- Including mounting plate for mounting on the coloscope
Accessories

Tray
For comfortable work with a laptop, free horizontal movement within a radius of up to 255 mm. Suitable for Swing-o-matic stands or Balance-o-matic stands¹.

Available in all colours within the RAL colour system.

¹ To attach tray to chair mounted Swing-o-matic stand, please contact our customer service!
LeiseCap

LeiseCap is a documentation software, which is specially adapted to the needs of practicing gynecologists. Together with the colposcope and camera, examination results can be quickly and efficiently documented and the progression of a disease shown.

Optional additional modules allow the adaptation of the software to the individual needs of your practice.

Integrated Modules

- **Video**
  - Image and video capture at full resolution by mouse, keyboard or foot switch

- **Image processing**
  - Addition of text and markings, correction of light, magnification of details

- **Database**
  - Capture and management of all patient, examination and image data; quick print and export functions

- **Print**
  - Printing of patient data and images through printing templates; archiving of correspondence; exporting to WORD; sending of emails

- **Print forms**
  - Creation of individual print templates, inclusion of logos or graphics possible; importing of previous templates in WORD or RTF format; organization of images by drag&drop

  Further modules are available (see Orders)

ColpoSoft

ColpoSoft includes the driver for the video camera and ColpoViewer, a basic documentation software.

- Camera driver for 3MVC LED USB
- ColpoViewer: easy recording and displaying of images, assignment to patient, data and defined saving location

**ColpoSoft is included in the delivery of the 3MVC LED USB model and the video camera.**

LeiseCap is delivered pre-installed on a laptop:

- Operating system: Windows 7 (German or English interface, 32 bit)
- Keyboard: German or English
- Dongle and foot switch included

Please contact us for other applications. We will be happy to advise you.
ColpoSuite

As with Leisegang, CooperSurgical’s central focus is women’s health. In order to maximise performance, we have combined different CooperSurgical and Leisegang products together and present the CooperSurgical-Leisegang ColpoSuite for the dysplasia clinic.

The ColpoSuite provides a full range of screening and treatment possibilities like colposcopy, LEEP and cryosurgery:

- Diagnosis and treatment under one roof
- Better workflow for gynecologists
- Reduced time for patient’s benefit
- Modular system
- Space-saving
The ColpoSuite consists of:

- Leisegang photo/video colposcope with integrated or external SLR camera, laptop, software
- CooperSurgical LEEP 1000 workstation with smoke evacuator
- CooperSurgical cryosurgery unit
- Dispensing module
- Module with built-in heating plate for preheating of specula
- All instruments required for colposcopy
- On request, we can recommend a suitable examination chair
**Product Finder**

**You have needs.**

**Standard Colposcopy**
You are looking for a standard colposcope without photo/video function but it should be upgradable to a photo/video colposcope:

**Suitable coloscope:**
- 1E LED x 15 fixed magnification
- 1D LED x 7.5/15/30 magnification
- 1DS LED x 3.75/7.5/15 magnification

For upgrading to photo/video colposcope, please use a photo/video adaptor and a camera.

**Suitable stands:**
- Upright
- Swing-o-matic stand
- Balance-o-matic stand

**Presentation**
You want to show the patient what you are doing on a monitor:

**Suitable coloscope:**
3MVS LED Y/C NTSC x 3.75/7.5/15 magnification, integrated video camera, Y/C (S-video) interface for connecting to an NTSC compatible monitor

**Suitable stands:**
- Swing-o-matic stand
- Balance-o-matic stand

**Documentation**
You want to capture pictures, save patient’s records and documents:

**Suitable coloscope:**
3MVC LED USB x 7.5/15/30 magnification, integrated 1.3 MegaPixel video camera
Optional: LeiseCap software pre-installed on a laptop, tray

**Suitable stands:**
- Swing-o-matic stand
- Balance-o-matic stand

**Documentation & Presentation**
You want to capture pictures, save patient’s records and documents and simultaneously show the patient or students what you are doing:

**Suitable coloscope:**
3MVC LED USB x 7.5/15/30 magnification, integrated 1.3 MegaPixel video camera
Optional: LeiseCap software pre-installed on a laptop, tray. Connection laptop – monitor with VGA cable or HDMI cable

**Suitable stands:**
- Swing-o-matic stand
- Balance-o-matic stand

**Scientific Work**
You teach, conduct research, deliver presentations, publish books or require detailed photo documentation in your patient records:

**Suitable coloscope:**
3ML LED x 7.5/15/30 magnification,
Optional: LeiseCap software pre-installed on a laptop, tray, digital SLR camera Canon EOS (please ask for the up-to-date model before ordering)

**Suitable stands:**
- Swing-o-matic stand
- Balance-o-matic stand
**Quick Finder**

1 Manufacturers of third party products are named
Leisegang offers individual training courses in colposcopy, our colposcopes, accessories, LEEP and Cryosurgery to domestic and foreign sellers as well as interested doctors.

In our training centre we also present our Colposuite (see page 20/21 of this catalog).

Training courses take place in our training centre in Berlin. Dates can be found on our website www.leisegang.de.

If you are interested in training in your own country, please contact our Leisegang Team (+49 30 319 009 0 or info@leisegang.de).

Furthermore, it is also possible to take part in a training course at CooperSurgical in Trumbull, CT, USA. Please contact us and we will arrange an appointment for you.

We look forward to your visit!

Your Leisegang Team
Regulatory and legal notices:
All Leisegang medical devices are manufactured and controlled under an ISO 13485 certified quality system and are CE-marked in the EU.
Leisegang colposcopes are available outside the EU after registration according to the applicable national / local regulation.
